Education

Master of Science, Computer Science | University of Central Florida — May 2025

- GPA: 3.6/4.0

Bachelor of Science, Computer Science | University of Central Florida — Dec. 2023

- GPA: 3.7/4.0

Experience

Programmer Analyst | Johns Hopkins University — Apr. 2024 - Present

- Develop immersive virtual reality training simulations for the da Vinci surgical system using Unity, C#, and Meta XR SDK to enhance user motor skills and procedural accuracy.
- Integrate advanced datasets, such as JIGSAWS, to create dynamic, interactive learning environments tailored to individual user needs, driving innovation in surgical education.
- Collaborate cross-functionally to design and implement scalable solutions, ensuring seamless functionality and user engagement for a professional audience.

Software Engineering Intern | JPMorgan Chase & Co. — Jun. 2023 - Aug. 2023

- Designed and deployed an ADA-compliant user interface for an internal application using React.js and Springboot, supporting 30,000 users and enhancing accessibility.
- Communicated with shareholders about project specifications and collaborated with a team of six using Agile and Kanban development strategies.

Full Stack Intern | Epic North LLC — Jun. 2022 - Apr. 2023

- Optimized website functionality and repaired code by leveraging Angular, TypeScript, C#, ASP.NET, and SQL, ensuring seamless client deliverables.

Teaching Assistant | University of Central Florida — Jul. 2021 - Dec. 2022

- Taught foundational Python programming concepts to classes of 230 students, provided timely feedback on assignments, and supported learning through labs and office hours.

Projects

VR Escape Room | Unity, C#, Blender, Git — Jan. 2024 - Apr. 2024

- Led a team of five to design and develop an interactive puzzle-solving experience in Unity, integrating custom assets and lighting effects.

SenseRator | Python, PySimpleGUI, Open3D, Git — Feb. 2023 - Dec. 2023

- A Python-based application integrating lidar and camera technology to perform object detection and semantic segmentation.

Top of the Schedule | React, JavaScript, ExpressJS, MongoDB, Git — Feb. 2022 - Apr. 2022

- A website that employs an algorithm based on class importance to create an optimal college career schedule for the UCF Computer Science undergraduate program.

Technologies

Languages:	Java, Python, HTML, CSS, JavaScript, TypeScript, SQL, C#
Tools:	React.js, Angular, ASP.NET, ExpressJS, Git, Unity, Unreal
Workflow:	Agile, Scrum, Kanban
Certifications:	AWS Certified Cloud Practitioner
